

# INSYDIN

MORE THAN YOUR EXPECTATIONS

# What is insydin?

Insydin Is A NFT Organisation With Some Of The Highest Graphics, Aesthetic Looking Artworks. We are Focused On Producing Unique And Original NFT Collections In The Web3.0 Space. We Will Make This Possible With The Help Of Several Young, Talented Artists And Developers.

# What is insydin?

A new revolutionary nfts. We have created a unique collection of stunning artworks living on the Solana blockchain. Afirix artworks have been uniquely designed with multiple traits and accessories, giving it a high rarity score that can be seen in low amounts in the market. Each artwork is different from the others.

A project housing a series of unique collections curated with separate goals in mind. With each collection interacting with one another. Our collections of Insydin NFTs are unique digital assets living on the Solana blockchain. Each artwork is unique and programmatically generated from over 150+ possible traits, including expression, holdable items, headwear, clothing, and more.

# Mission and vision

We are here to create a difference. We are here to help artists around the world. Insydin Is A Highly Collaborative Community Designed To Give The Artists What They Deserve And Also To Grow The Web 3.0 Space In The World. We will start a documentary about the search for talented artists so that they can get an opportunity based on their talents. We will invite the artists and test their capability, The ones who are capable enough will get invited to Insydin and get a verified artist position or you can say role. We are planning to do this after a certain point when Insydin gets enough fame and hype in the NFT space so that we can help the artists financially by promoting their NFTs & Artworks on our socials & other platforms.

# Community Driven

We are fully dedicated to becoming an entirely community-run project. The community is the key to the success of every NFT project! We will strive to the best of our abilities to keep holders happy and motivated with the innovative solutions we bring and the dedicated & hard-working team that we have!

## Equality

Our Community Has Many People Across The World And It Creates A Sense Of Equality By Forgetting Religions, Casts, and Nationality.

## Affection

It Creates A Special Bonding With Everyone In Our Community Even though We May Not Know Each Other Physically But The Friendliness Is Important.

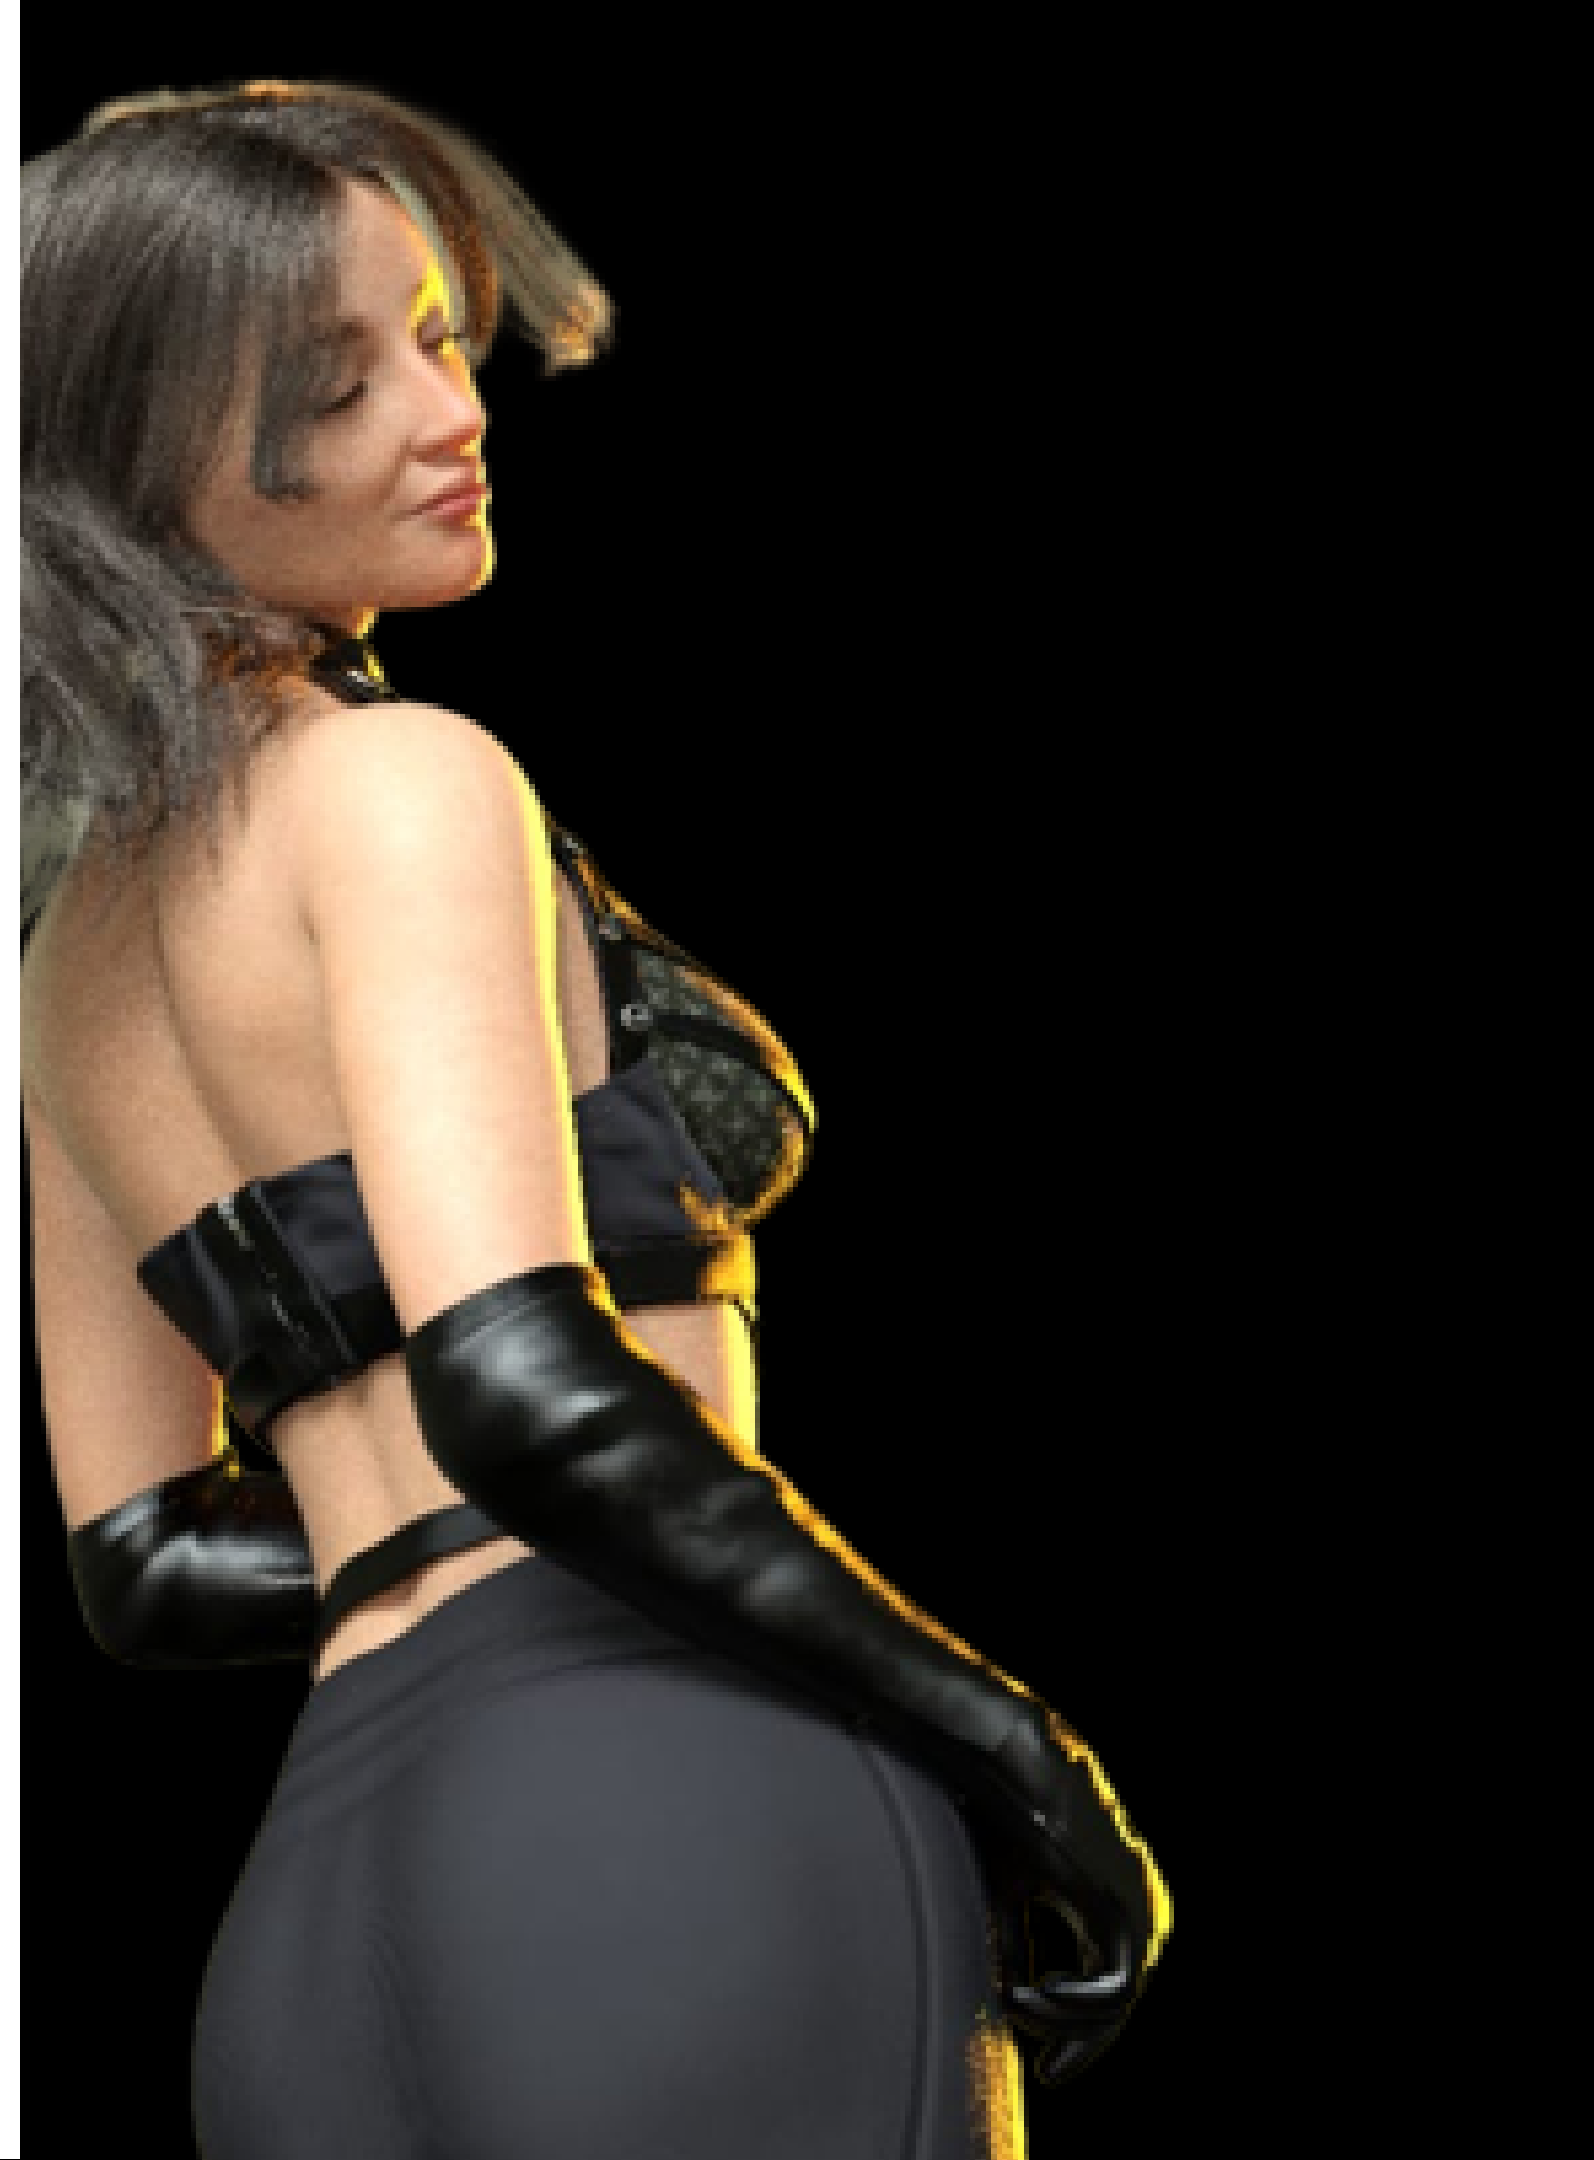

# Knowledge

When We Communicate With Other People We Get To Know About Many Things Happening Around Us Also It Helps To Increase Our General Knowledge.

# Moral Values

Similarly, When We Come Across People We Are Introduced To Some Moral Values Which Everyone Is Tend To Have, Like The Way Of Communicating And Behaving In The Society.

## Giveaways & Rewards

We plan to organize regular giveaways, raffles, and fun incentives for our members with the rewards being invitations to parties, merch, free NFT, whitelist, crypto, and luxury goods!

## Community Wallet

We will create a Community Wallet with the intention of redistributing 25% of the Royalty Fees income from the secondary market back into the Community Wallet. The community can vote on what we will use the funds for and ensure that we keep the project growing!

**CONNECT WALLET**

## Minting

Members who win the whitelist spot will be able to mint the nfts before the public sale starts. Minting will be done on the Solana Blockchain.

We will be transparent with our minting process. We will elect holders who want to contribute to the project's growth, granting them the option to work alongside our core team and take this project to greater heights!

When you buy an exgirls, you're not simply buying a collectible or a provably-rare piece of art. You are joining an organization with a common goal of making a difference in the world of art.

## Benefits to holders

As long as you own at least 1 exgirls NFT,  
You will have access to our private channels within the Discord community by being a holder. In addition.  
You will have access to our merchandise in different merch stores that we will partner with in the future.  
You will have access to our metaverse world

## DAO & Governance

Each exgirls Holder can participate in the DAO to determine or influence the project direction!  
The voting power of each holder is determined by the amount of Insydin NFT collections they hold.  
1 nft = 1 vote

# Metaverse

We plan to build our own virtual member space for holders to collaborate as their unique Insydin avatars. Our metaverse space is planned to be the Insydin Headquarters that NFT holders can access. Here influencers, collections, artists, and investors can hang out together and create amazing projects!

# ROADMAP 1.0
